Technical Data Sheet

BLUE LED ROCKER SWITCHES

LED (Blue) Rocker Switches

These rocker switches are designed to blend in with todays modern truck cabs. Smooth feel with a blue LED backlight.

This is a practical design for todays cabs for the operator on a limited budget. Offering a modular layout to suit almost any application. Switches can be fitted directly within the trucks dashboard or fitted together via the modular holders for a custom look.

Ideal to be matched to our CK158A solenoid banks.

Product Features

- **Constructed from Durable ABS Plastic**
  Provides long life.
- **Modular Mounting**
  Direct in dash or via slide together housings.
- **Versatility**
  Can be used on a number of different systems.
- **IP68 Rating**
  Ensuring operation in all conditions.
