

IT'S GREEN AND IT'S GREEN.

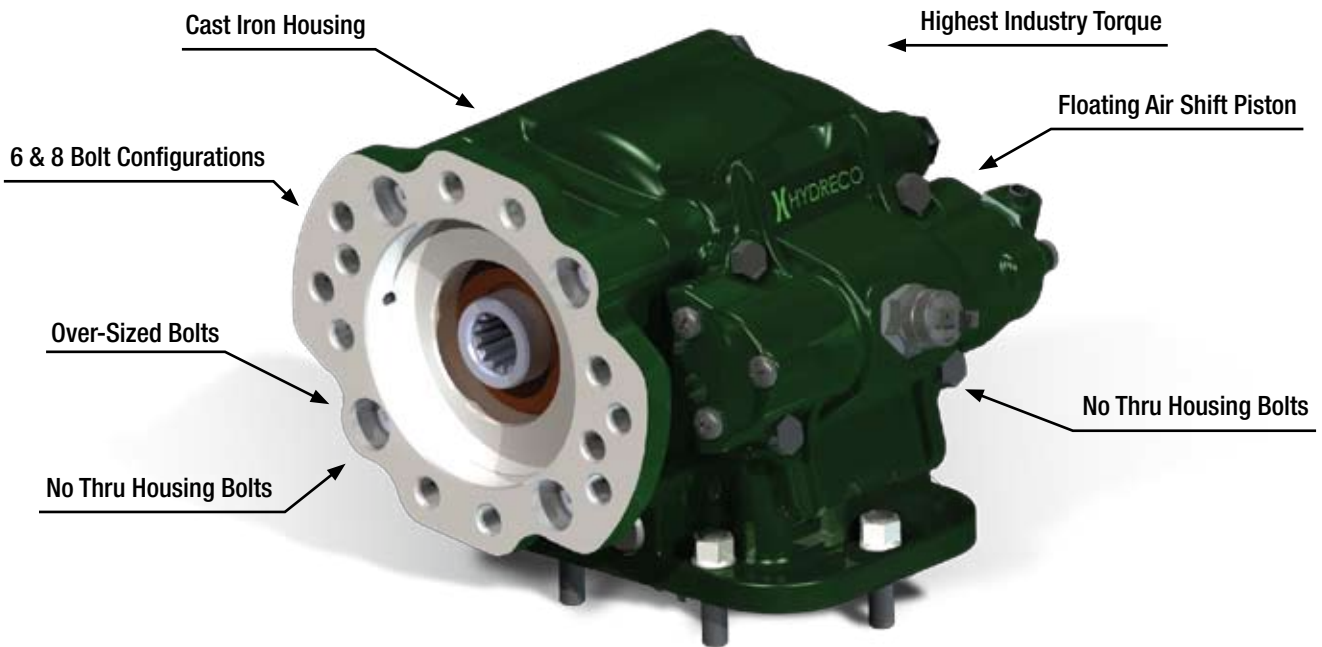

A GREEN POWER TAKE-OFF UNIT IS THE ENVIRONMENTALLY RESPONSIBLE CHOICE.

Hydreco's New 6 & 8 Bolt Standard Green Series PTO is all cast iron with the most environmentally conscious design in the market. All "O" ring seals with a machined stop for the output shaft seal promote a leak-free environment. The transmission pickup gear and ratio gear is removable from the shaft to lower inventory requirements. The highest torque in the industry is anchored by a side thrust bearing to reduce heat and premature wear ensuring longer life.

The New Hydreco 6 & 8 Bolt Standard Green Series PTO is painted green because, well, we like the color.

HYDRECO'S NEW 6 & 8 BOLT STANDARD GREEN SERIES PTO

6 & 8 Bolt Standard Green Series Power Take-Off Unit Product Features
